Contact us at 604-922-6572 or visit our website at www.picanada.ca to learn more.

Smart device hacking can be much more dangerous than you may think. As technology advances, so does cybercrime.

There are multiple ways a hacker can target a smart device:

- Outdated software.
- Hacking Wi-Fi networks.
- Public charging stations.
- Phishing - placing malware on your device.
- Buying your information on the Dark Web.

How can you protect your smart device from being hacked?

- Use a VPN.
- Keep up to date with software.
- Monitor app settings.
- Avoid auto-login features.
- Use a anti-virus software.
- Learn the signs of an attack.

BCSI is equipped with state-of-the-art digital intelligence forensic software, and our in-house IT
